

## **What are Vocational Skill Development services?**

Sarthak Skill Building centers are engaged in providing free of cost training services to persons with disability. And, after successful completing the training, trainees are provided certificates & placement support.

To get certified a candidate must fulfill two requirements:

1. 70% or more attendance in training sessions
2. 70% or more scores in Assessments (In case of lesser scores, candidates are provided extra classes and support, and tests are conducted again).

The training program is designed to provide required skill set to PwDs, so they can get selected for the suitable jobs and sustain them at the workplace.
